

Cupola

Design with fire & style | No more smoke, soot & ash

CUPOLA is a flueless fireplace equipped with the best bio-ethanol burner available which means there is no smoke, soot or ash. The fireplace is produced in Sweden and has been developed in collaboration with researchers and engineers at the Chalmers University of Technology in Gothenburg. CUPOLA is a wall-mounted fireplace that is simple to install on most types of walls, thus offering great versatility and multiple placement options. It is also kind to the environment and does not produce any harmful emissions or particles. This makes CUPOLA ideal for all kinds of homes. CUPOLA produces cosy warmth that spreads through the room and the size of the flame can be fully adjusted. CUPOLA is available in a range of colours.
