

COOL FLAME 500 SEE-THROUGH FIREPLACE WATER VAPOUR FIREPLACE

Net Zero fireplace with Optimyst® technology

OPTIMYST® TECHNOLOGY

This technology utilizes ultra-fine water mist and LED lighting to simulate the appearance of real flames and smoke. The water mist, produced by a silent ultrasonic atomizer, is illuminated by LED lights, creating a convincing illusion of flames and smoke that is almost indistinguishable from a real fire. You can change the colour and intensity of the flame, adapting the atmosphere of the fireplace to your tastes or interior design.

CUSTOMIZABLE FIREBOX

Cool Flame Fireplace has a unique firebox that gives you the option to install the fireplace in one of three possible arrangements.

REMOTE CONTROL

The remote control feature designed for your convenience. With a practical remote, you can easily control all the features of the fireplace without having to get up from your couch.

SOUND OF CRACKLING WOOD

Includes a realistic wood crackling sound effect, enhancing the experience of a traditional fire. Cool Flame comes with an optional log set, enhancing the authentic fireplace experience and adding an extra touch of traditional charm to your modern fireplace.

EASY REFILLING

Cool Flame is designed for ease of use, featuring a simple water dispensing mechanism that works with standard tap water. It has a removable water tank that can be easily and effortlessly taken out, refilled, and then put back in place, ensuring uncomplicated operation and maintenance.
