

Globe

Design with fire & style | No more smoke, soot & ash

GLOBE is a flueless fireplace equipped with the best bio-ethanol burner available which means there is no smoke, soot or ash. The fireplace is produced in Sweden and has been developed in collaboration with researchers and engineers at the Chalmers University of Technology in Gothenburg. GLOBE is a freestanding fireplace that does not require permanent installation, thus offering great versatility and multiple placement options. It is also kind to the environment and does not produce any harmful emissions or particles. This makes GLOBE ideal for all kinds of homes. GLOBE produces cosy warmth that spreads through the room and the size of the flame can be fully adjusted. GLOBE is available in a range of designs and colours.
